ETAILED ACTION

This action is in response to the application filed on 20 September 2001 in which claims 1-26 are pending.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach a hearing aid having an adaptive microphone system comprising: a processor adapted to compute an average signal level, determine a difference in the average signal level between first and second inputs, determine a differential level value by integrating the difference in average signal over time, compare the differential value to a threshold, and adjust a correction parameter value of at least one input signal based on the result of the comparison, substantially described and connected with the other functional language of the recited claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

EP 1-191-817 A1 teaches the adaptive microphone matching of the present invention; however since assignee and the inventorship is the same, this reference is not applicable.

Art Unit: 2646

US 2002/0034310 teaches an adaptive microphone matching that calculates long-term constants which is also an essential element of the present application. However, the precise circuitry used for calculating the time constants do not utilize integration and comparison elements as taught by the present application.
